

Danielle Harper

Health care data analyst with over 6 years of experience optimizing care operations and clinical reporting

A results-driven analyst with expertise in health informatics, performance metrics, and electronic health records (EHR) system integration. Experienced in transforming raw health care data into actionable insights that improve patient outcomes and operational efficiency. Passionate about using analytics to drive better care decisions and reduce system inefficiencies.

- Statistical analysis
- Tableau

PROFESSIONAL EXPERIENCE

- **Health Care Data Analyst, WellPath Medical Network, Atlanta, GA**
February 2021 – Present
 - Analyze care delivery metrics and generate reports used in quarterly board reviews and clinical quality improvement initiatives
 - Use SQL and Tableau to develop dashboards tracking infection control, patient wait times, and readmission rates
 - Partner with compliance officers to audit and clean data, ensuring 100% HIPAA compliance across systems
- **Data Reporting Analyst, Unified Health Services, Decatur, GA**
July 2021 – January 2021
 - Supported reporting needs for patient outcome studies across 10 clinics using EHR and claims data
 - Built Excel models to project care costs and patient retention trends, leading to a 15% increase in operational efficiency
 - Created documentation standards for clinical data requests that reduced report errors by 28%
